Samavati, L. Clinical genetic evaluation in identifying the etiology of autism. Citation: Rossignol DA and Frye RE Evidence linking oxidative stress, mitochondrial dysfunction, and inflammation in the brain of individuals with autism. J Inherit Metab Dis ; 29 : Recently, this mouse model was reported to have abnormal mitochondrial morphology. mtDNA deletions occur mostly because of pathogenic mutations in genes responsible for intergenomic communication; however, they are often related to ageing or harmful environmental factors as Mitochondria and Autism Spectrum Disorders because mtDNA has a poor DNA repair system [624].
