To a technician, the emotions in the market may be irrational,
but they exist. The greatest fall in the price is in the month
of July and the highest peak in the price in the 1 year period
is in the month of august ideally one should buy a share that
is oversold and sell a share that is overbought. The Economic
Times is committed to ensuring user privacy and data
protection.

At any given moment, an equity's price is strictly a result of supply and demand. However, the closing price is often considered to be the most important price in stock data compared to the high and low for the day and this is why it is the only value used in line charts. In this case, the close is well below the high and much closer to the low.

Technical Analysis Technical analysis is a trading discipline employed to use indicators are used to help assess whether an asset is trending, and if it is, the probability of its direction and of continuation.
