The most obvious difference between a tablet and a laptop is the lack of a keyboard. This differentiates them from laptops in that laptops are meant to be productivity tools as well as media consumption devices. You also have a plethora of hardware options, too – from the aforementioned Fire tablets to Samsung's wide-ranging offerings to the Asus ZenPad series, to name just a few. It is tempered glass and nearly indestructible. This is probably the biggest reason to go with a tablet compared to a laptop. Next Article: Prime Day The best deals available right now. There's also a useful anti-theft feature that locates your device on Google Maps if it's ever lost or stolen.

Shoot me dead if you say that taking a real piece of paper and placing it under a guess we'll have to wait and see how tablets evolve! You may have seen the tests I did before going on holiday this year, comparing the iPad with the Windows 8 tablet for suitability as a reading device – the iPad won, of course Reading eBooks on Your Tablet: Windows 8 vs.
