Lung irritants can trigger or worsen asthma attacks in some people. Keep a record of how many puffs you use each week. [Learn how to enable JavaScript on your browser.](#) [Enter your email address to subscribe.](#)

New research reveals that flying insects that make their way into hospitals can carry many harmful bacteria able to cause dangerous infections. During exercise and physical activity, you will often breathe more quickly through your mouth, causing cold and dry air to travel to your lungs, irritating the airways.

Many patients, however, attributed side effects to inhaled corticosteroid. Disinformation and anxiety may lead to the patient reported changes made to medication without informing their doctor.
