It also can be useful for teach primary care physicians. Tumour distribution SCCHN is a broad term encompassing epithelial malignancies that arise in the paranasal sinuses, nasal and oral cavity, pharynx and larynx. Recommend Documents.

LeadersGenerationProgrammeAsiaAnexciting,intensivecoursedesignedfor Optimal medical care of relevant concomitant diseases is Head and Neck Trauma: An Interdisciplinary Approach. Written by an interdisciplinary team of experts in ear, nose, and throat trauma; oral and maxillofacial surgery; neurosurgery; and accident surgery, this book is a state-of-the-art manual on the diagnostic, treatment, and therapeutic techniques available to manage trauma injuries to the head and neck. Co-morbidity has been referred to as one of the factors accounting for treatment modifications, as coexisting cardiovascular, pulmonary or hepatic disease could affect treatment tolerance and clinicians often have to modify the treatment schedule in order to decrease therapy-related toxicity. SearchArticlesearchSearch.Chronological age alone should not be a contraindication to adequate oncological

surgery and, thus, aggressive surgical approach is recommended when risk assessment is favourable. Italiano et al.
