Reflecting how the need for new applications drives the development of new lubricants. Cost, environmental, and performance issues coupled with legislative changes, new engine oil requirements, and technology development for exploration of space and the oceans are changing the lubrication additive market. New chapters cover ground-breaking topics including cyclohydrocarbons, gas-to-liquids GTL natural oils as lubricants, chemically modified vegetable oils, the biotechnological enhancement of soybean oil, automatic and continuously variable transmission fluids, environmentally friendly hydraulic fluids, fire-resistant Second Edition (Chemical Industries) fluids, vegetable oil-based engine oils, magnetizable fluids, lubricants for the disk drive industry, fluids for food-grade

applications, the critical cleaning of advanced lubricants from surfaces, and diesel automotive trends.
