A key factor influencing the cost of dialysis care is the timing of referral to a nephrologist. An economic evaluation of early versus late referral of patients with progressive renal insufficiency. Most previous studies comparing the efficacy of intravenous iron and oral iron focused on the ESA dose and anemia improvement, and few studies compared the long-term safety of both options in terms of QOL and survival. This Issue. Li and C. Current end-of-life care for these patients has not been sufficiently discussed despite their high mortality rate [ 4 ]. The facilities that responded haddialysis consoles an increase of from the previous yeara simultaneous dialysis treatment capacity of , and a maximum dialysis treatment capacity of , Plantinga, N. Patients who are employed have a greater tendency to select PD. is unique that most of the facility in Japan adopts central dialysate delivery system, in which dialysate made by a central machine is delivered to each bedside dialysis machine. J Bone Miner Metab.
